#### **DETAILED ACTION**

#### Restriction/Election

## Three Specie Election Requirements:

This application contains claims directed to the following patentably distinct species of the claimed invention:

First specie election requirement:

Specie A: calculating step that is calculating a fragment-fragment cutoff for the selected conformer (claim 4)

Specie B: calculating step that is calculating a solvation energy for the selected conformer (claim 5)

Specie C: calculating step that is calculating an energy offset for the selected conformer (claim 6)

### **Second** specie election requirement:

Specie D: comparing that involves comparing corresponding bond lengths (claims 16-17)

Specie E: comparing that involves comparing corresponding bond angles (claims 18-19)

Specie F: comparing that involves comparing a pair of corresponding partial charges (claims 20-

21)

Art Unit: 1631

**Third** specie election requirement:

Specie G: determining step that is determining a derivation point of the selected conformer

(claim 7)

Specie H: determining step that is determining a center point of the selected conformer

(claims 22-24)

were searched together.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed specie for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. The distinctness or independence of the various calculating steps (first specie election requirement) is because they contain different goals that require different methodology. The distinctness or independence of the various comparing steps (second specie election requirement) is because they involve different features that are not required by the other species. The distinctness or independence of the determining steps (third specie election requirement) is because they determine points with distinct features. All of these usages are distinct as requiring

Applicant is advised that a reply to this requirement must include an identification of the specie that is elected consonant with this requirement, and a listing of all claims readable

distinct and different functions or features thereof without overlapping search due to different

subject matter. This lack of overlapping searches documents the undue search burden if they

Art Unit: 1631

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should an applicant traverse the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Because these species are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Page 5

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Papers related to this application may be submitted to Technical Center 1600 by facsimile transmission. Papers should be faxed to Technical Center 1600 via the PTO Fax Center. The faxing of such papers must conform with the notices published in the Official Gazette, 1096 OG 30 (November 15, 1988), 1156 OG 61 (November 16, 1993), and 1157 OG 94 (December 28, 1993) (See 37 CFR §1.6(d)). The Central Fax Center number for official correspondence is (571) 273-8300.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Carolyn Smith, whose telephone number is (571) 272-0721. The examiner can normally be reached Monday through Thursday from 8 A.M. to 6:30 P.M.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrew Wang, can be reached on (571) 272-0811.

Any inquiry of a general nature or relating to the status of this application should be directed to Legal Instruments Examiner Tiffany Tabb whose telephone number is (571) 272-0556.
